pluralsight
hardcore dev and IT training

You Have an Idea or a Need

- **To make money or save money!**

- **Search is an important piece**
  - Frustrate users
  - Or entice them!

- **But search is haaaard or expensive**
  - Looong, steep road…
  - Is it?

- **Solr to the rescue!**

Apache
Solr

You Have Data

- **Multiple sources**
  - Databases
  - CMS
  - Files
  - RSS feeds
  - Web pages
  - Users

- **Different ways of getting data**

- **Get to know your data!**

Get Your Solr Ready

- **Model your data (schema.xml)**

- **Configure your Solr (solrconfig.xml)**

- **Index data**

- **Search your data**

- **Ready to use from your application**
  - Via REST

You Have SolrNet

- **And use SolrNet if you are a .Net dev to connect to Solr**
  - SolrJ or other options too

- **Look at the SolrSampleApp**

You Are On The Right Path!
